

RACING BIO AIR FILTER CLEANER

Quickly biodegradable cleaner for air filters

Description

Developed with Twin Air. MOTOREX RACING BIO AIR FILTER CLEANER is a cleaner in powder form specially developed for off-road motorbikes and quads (ATVs) that feature a reusable foam air filter. Thanks to its active substances, it also quickly dissolves the most stubborn dirt.

Advantages

- developed by MOTOREX Racing Lab in collaboration with Twin Air
- Powder form
- biodegrades quickly
- completely and quickly removes even the most stubborn dirt
- for reusable foam air filters
- easy and quick to apply
- Flushing with running water
- protects the environment

Application

Add three litres of tap water – i.e. the total amount possible – to the MOTOREX AIR FILTER CLEANING TUB. Add 100g of the air-filter-cleaning-powder to the water (100g RACING BIO AIR FILTER CLEANER is required per filter). Fully immerse the contaminated filter in the water (while doing so, wear safety gloves or disposable gloves and make sure that hands are not burned). Let it soak for ten to fifteen minutes. Then squeeze the filter several times (but do not wring it out). Repeat this procedure until all contamination has been removed. Afterwards, rinse the filter with clear, clean, cold tap water until all soap residues have been removed. As soon as the filter is dry, it can be re-lubricated with MOTOREX RACING BIO AIR FILTER OIL and used again after around two hours.
